Game menu interface with a dark background and a white border. At the top left is a small blue cube icon. To its right is a 2x2 grid of player avatars. Below these are three menu items: "HOW TO PLAY", "SETTINGS", and "SAVE & EXIT". The "SAVE & EXIT" item is highlighted with a green background. The rest of the menu area is dark and mostly empty.

A white dialog box with a black background for the text area. The title bar at the top says "SAVE & EXIT". The main text asks "Are you sure you want to save and leave the game?". At the bottom, there are two buttons: "SAVE & EXIT" and "Cancel".

DESCRIPTION

Minecraft: Education Edition is hosting its first ever Global Build Championship, inviting students around the world to design healthy spaces for animals and humans to thrive together! Register your team of 1-3 students at aka.ms/MinecraftEducationChampionship, complete your build, then submit your creation for the chance to win Minecoins, awesome Minecraft gear, and more!

OBJECTIVES

Over the past 9 months, we've seen the impact of less people on the natural world. Whales have changed their migration patterns due to fewer ships, sea turtles have laid record eggs on beaches empty of humans, and wild monkeys have taken over city streets. Wildlife roamed free while people isolate to stay healthy. These stories cause us to wonder: what if we could redesign our human environment to accommodate the animal world: what would it be like if animals could still roam free within human environments? Your challenge is t... [Read More](#)

EXTENSIONS

Travel to the Arctic, Jungle, Beach, Plains, and Forest biomes to learn more about challenges animals face there today. Design solutions for animals and humans to survive and thrive in these biomes together! [Read More](#)

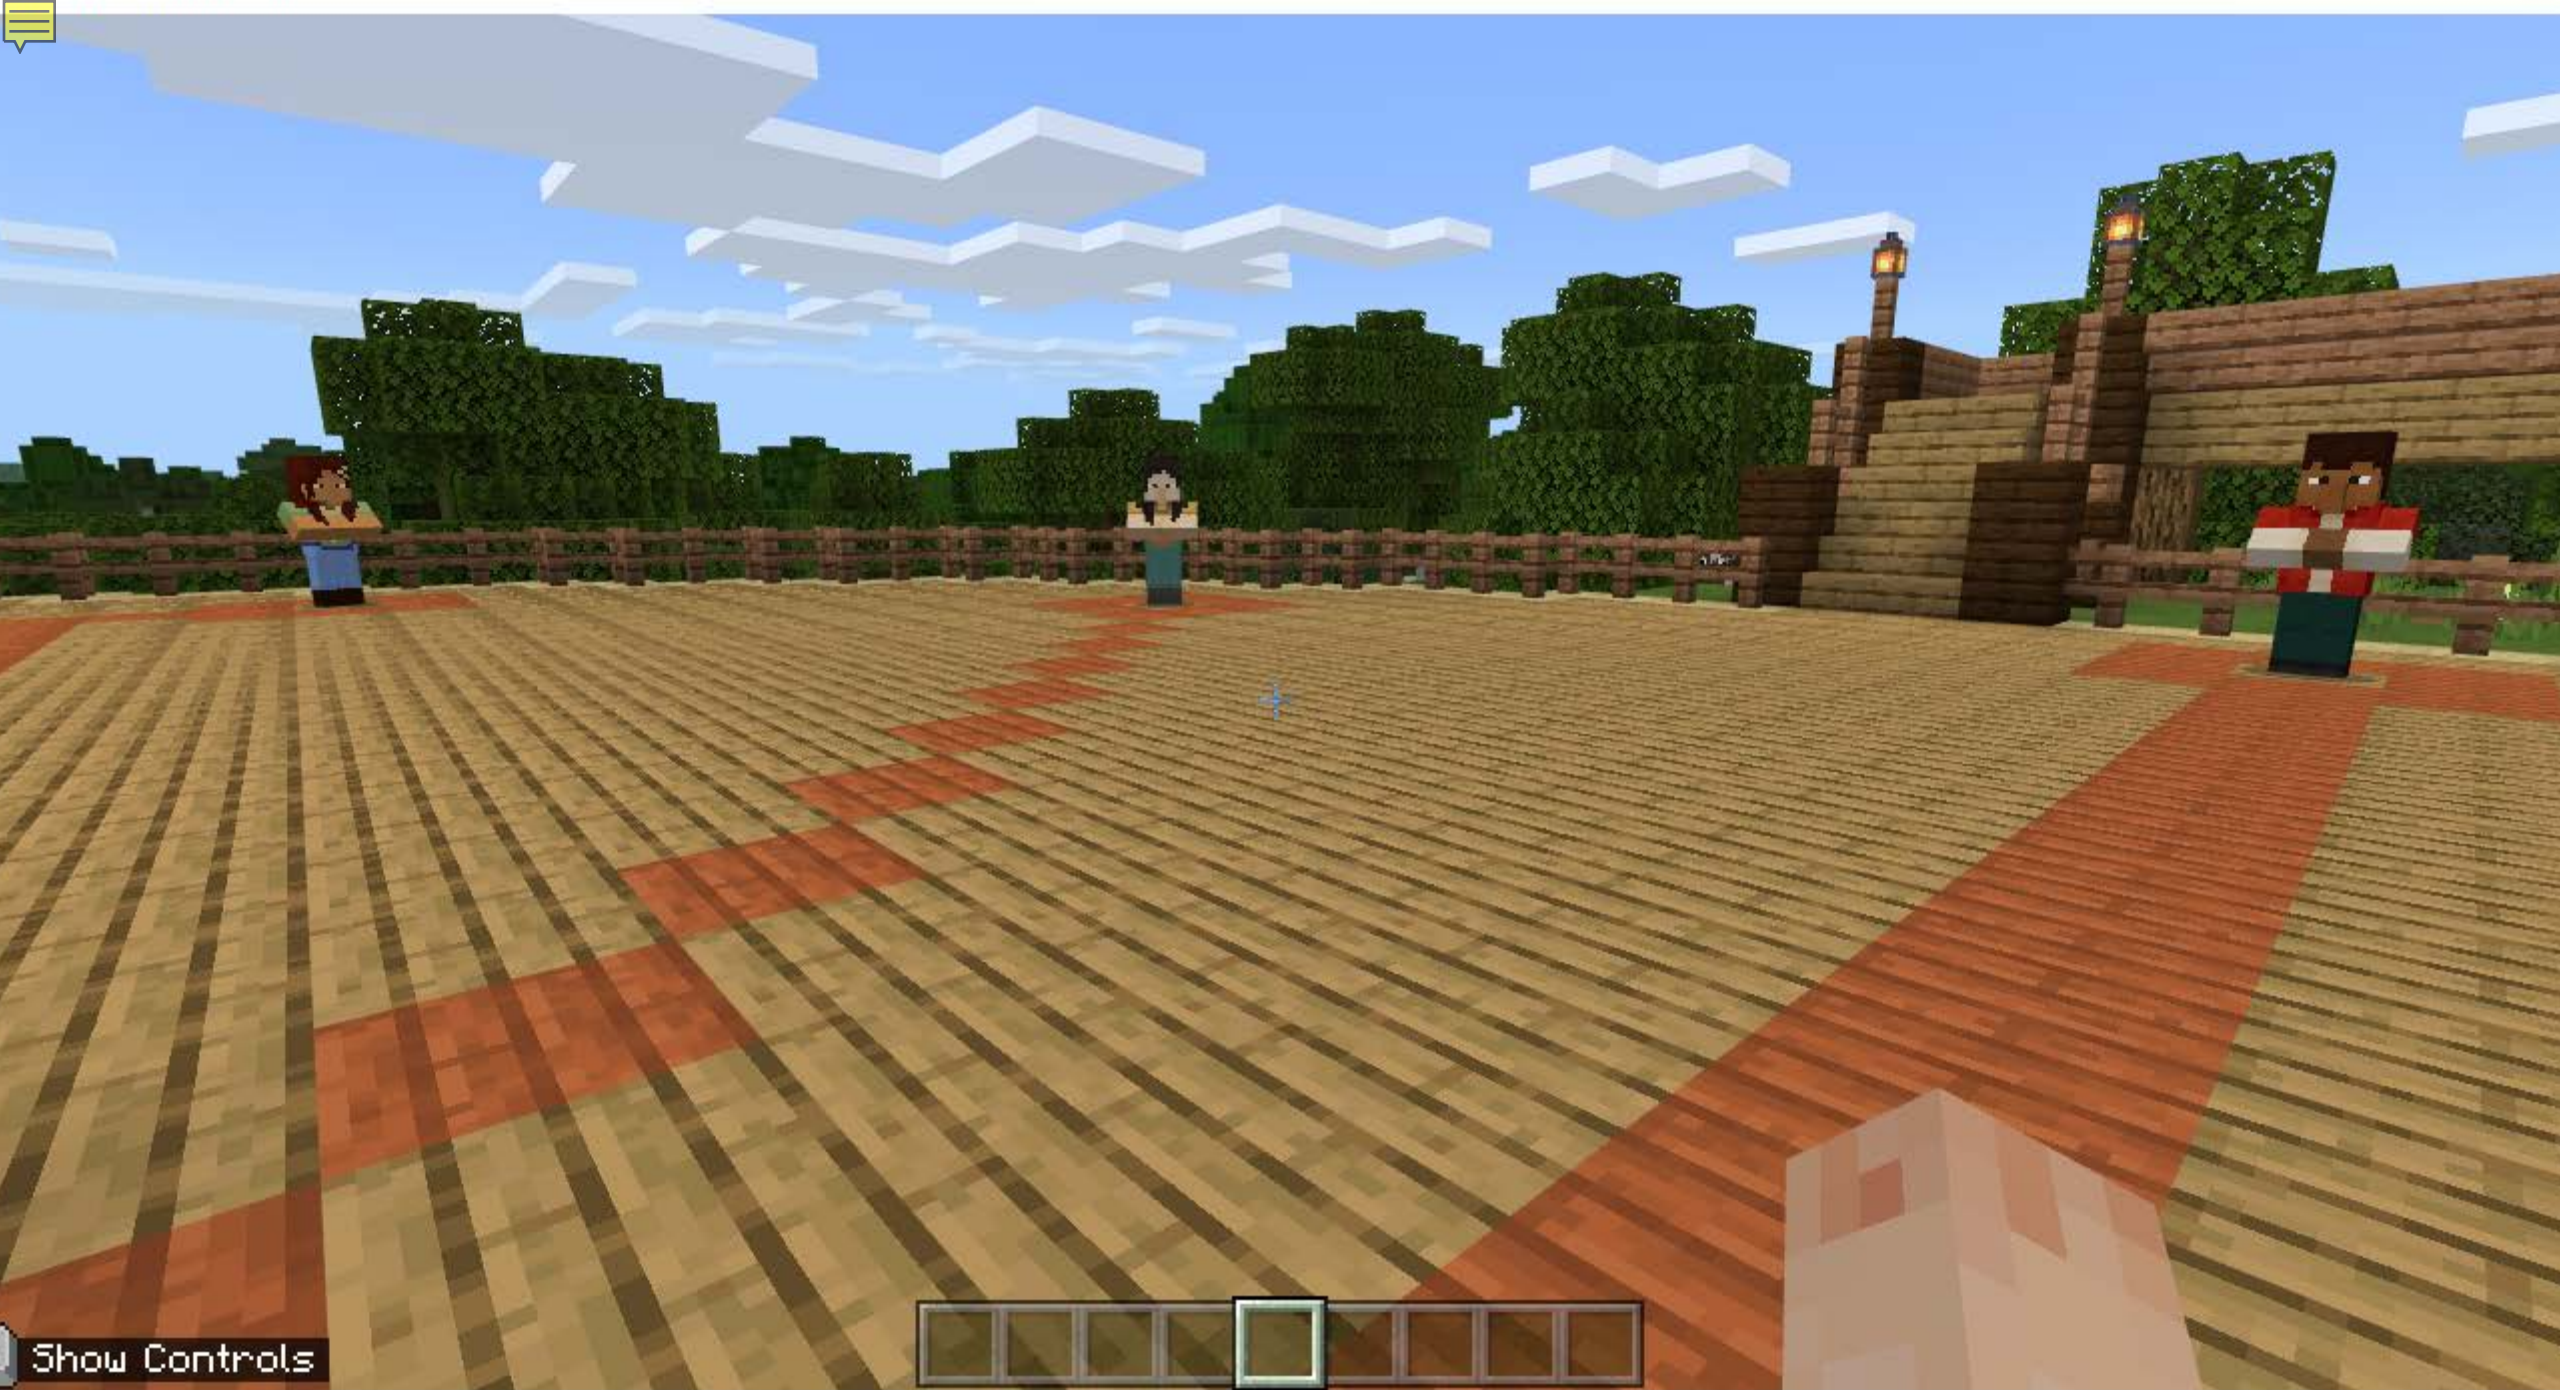

Global Build Championship Instructions!

You are tasked with solving a global challenge today!

Your challenge is to design and build a space that supports a healthy environment for both humans and animals. Choose between designing a school, home, work or public space, and select a biome or habitat. Behind you, you will find 5 different prompts. Select the one that is most interesting for you and travel to the biome associated with that prompt. You then need to design a space where both animals and humans survive and thrive. Good luck, and happy building!

Plains Warden

The diverse wildlife that roamed these vast grasslands are not lost. They still call this place home, but their calls are muted and tracks and nests less abundant. Originally the region was a nearly continuous sea of rich grasses, watersheds and wildflowers. Today, demand for agricultural commodities and new crops encourage the degradation of native grasslands, increasing incentives to till the land while draining waterways and watersheds. In the Northern Great Plains, WWF predicts erratic weather will result in more extreme levels of heat, snow and rain, severe floods and droughts.
